

VIVEK SHAH

Senior Product Designer — Enterprise SaaS | Design Systems | Accessibility

Dubai, UAE · Immediate Joiner · Open to Relocation · vivekshah061993@gmail.com · [+971 58-542-3269](tel:+971585423269) · vivekshah.netlify.app

PROFILE SUMMARY

Senior Product Designer with 10+ years crafting intuitive, user-centered interfaces for enterprise SaaS, fintech, and healthcare platforms. Deep expertise across the full product design lifecycle — discovery, user research, wireframing, high-fidelity prototyping, usability testing, and developer handoff. Proven track record leading design systems at scale, improving measurable product outcomes, and mentoring design teams within distributed, cross-cultural Agile environments. Strong command of WCAG accessibility standards and close front-end collaboration, ensuring designs ship exactly as intended.

30%

Faster task completion — GST e-Invoice redesign

20%

Less dev rework via unified design system

5+

Enterprise apps unified under one design system

10+

Years in UI/UX design

CORE SKILLS

Frontend Collaboration: HTML5, CSS3, SCSS, Bootstrap, Material UI, Tailwind CSS, Kendo UI, JavaScript, jQuery, ReactJS, Angular

Workflow & Tools: Agile/Scrum, Jira, Git, Bitbucket, SVN, Cross-functional Collaboration

Leadership: Mentoring & Team Leadership, Stakeholder Communication, Cross-cultural Collaboration, Presentation & Storytelling

PROFESSIONAL EXPERIENCE

Senior Product Designer | Cygnet Infotech Pvt. Ltd.

Jun 2019 – Present

- › Led end-to-end redesign of the GST e-Invoice enterprise platform, achieving a 30% improvement in task completion time and a measurable boost in user satisfaction scores.
- › Architected and implemented a comprehensive design system adopted across 5+ enterprise applications, reducing design-to-development rework by 20%.
- › Designed complex enterprise dashboards for GST compliance tools — Cygnet Tax, Cygnet Vendor Postbox — with full WCAG 2.1 accessibility compliance.
- › Received a Spot Award (Nov 2024) for delivering a litigation module UI under a tight deadline with 100% responsiveness and cross-browser compatibility.
- › Partnered closely with frontend developers throughout the full development lifecycle, ensuring pixel-perfect, developer-ready handoffs via Figma.
- › Mentored and up-skilled junior designers in UX principles, design system usage, and accessibility best practices.
- › Collaborated with product managers and business analysts in Agile/Scrum ceremonies to define UX strategy and prioritize backlog items.

Frontend / UI Developer | GreenApex LLP

Feb 2019 – May 2019

- › Developed and maintained user-facing webpages using HTML5, CSS3, JavaScript, and jQuery with emphasis on responsive, multi-device layouts.
- › Created responsive designs optimizing layouts across mobile, tablet, and desktop platforms.
- › Mentored junior designers on UX and UI best practices to raise team quality standards.

Front End Designer | IndiaNIC Infotech Limited

Sep 2017 – Jan 2019

- › Delivered clean, standards-compliant HTML and CSS across multiple client projects.
- › Built responsive websites ensuring optimized performance, usability, and cross-browser consistency.
- › Collaborated with cross-functional teams including developers, QA, and project managers.

Web Designer | Prime Apps Infotech

Dec 2015 – Jul 2017

- › Designed and developed responsive websites optimized for mobile and desktop platforms.
- › Improved website performance through asset minification, CDN implementation, and code optimization.
- › Redesigned multiple client sites to enhance navigation structure, visual appeal, and conversion rates.

PORTFOLIO HIGHLIGHTS

Cygnnet Tax — GST Compliance Platform Designed responsive enterprise dashboards for GST compliance workflows, focusing on data density, clarity, and task efficiency for finance professionals. Improved user satisfaction through iterative UX research and testing.

Cygnnet Vendor Postbox — Vendor Management Delivered intuitive UI for a vendor management system handling invoice submissions and approvals, enhancing user adoption through simplified navigation and clear information hierarchy.

Spring Money — Fintech Platform Designed a responsive front end for a B2C fintech platform, focusing on intuitive onboarding flows, financial data visualization, and mobile-first design principles.

DocDoc — Healthcare Web Platform Created accessible healthcare web interfaces meeting WCAG 2.1 standards, improving usability for diverse patient and provider audiences across devices.
